

EURONORM STACKING BOX ESD

Handle grip

Art. no. 330-000000170

WERIT Euronorm ESD stacking bins, made from electrically conductive plastic, have been specially developed for the safe transport and storage of electronic components. Their design and material prevent any potential electrostatic discharge. The optimal design of the plastic containers protects the contents from damage, contamination and moisture.

FEATURES

- Suitable for manual handling and automated conveyor systems
- Highly stable thanks to reinforced frame and corner construction
- Impact-resistant, shatterproof and dimensionally stable
- Resistant to acids and alkalis
- Made from electrically conductive plastic (PP-EL)
- Surface resistance: $10^4 - 10^6$
- 100% recyclable

External dimensions	400 x 300 x 220 mm
Volume	21 Liter
Material	PP-EL
Packaging	72 Pcs. per palette
Colour	black
Version	Base closed, Sides closed, Handle grip
Accessories	ESD slip lid, ESD removable lid, ESD hinged lid, Euro pallet 1200 x 800

Notice

All dimensions, weights and technical data listed in the catalogue are reference values. They do not represent any binding assurance of certain properties or the suitability for certain uses. Tolerances based on technical specifications according to DIN standards. Amendments and corrections are subject to change.

The details are based on our current technical knowledge and experience. Due to the abundance of possible influences during the use of the product that are outside our control, the user is not released from making their own inspections and tests.

A legally binding assurance of certain properties as well as the suitability for a specific application cannot be derived explicitly or implicitly.

If necessary, property rights must be observed.
