

H2 Hygienic pallet

with central detent and antislip edge | 800 x 600 mm

USE | REQUIREMENT

The plastic half pallet H2 is the ideal complement to the EURO H1 hygienic pallet and the E box system

FEATURES

- Excellent cleaning properties, as with the EURO H1
- Secure handling of all common box systems
- Dimensionally stable from -40 °C to +70 °C
- With central detent and antislip edge

FACTS & FIGURES

Dimensions: 800 x 600 x 160 mm
Weight: 9 kg
Dynamic load-carrying capacity: 500 kg
Material: Virgin HDPE plastic
Floor contact: Closed runner system

Static load:
Compression strength with level floor contact and evenly distributed load at approx. 20°C room temperature.

Dynamic load:
On the forklift with selected, evenly distributed load at approx. 20°C room temperature.

In a racking system:
With evenly distributed load along the longitudinal sides (goods in bags), resting on two supports for more than 100 h at approx. 20°C room temperature.

All the technical details are characteristic properties which have been determined under specific test conditions. Different values may be obtained when used under different conditions, such as load type, ambient temperature and standing time, which can be tested upon request.

LOGO

Marking

Hot embossing of lettering, logos and numbers possible upon request, depending on quantity.

Position: Forklift openings / 800mm sides
Size: max. 220 x 30 mm
Quantity: 32 pcs, with 15 mm letters
22 pcs, with 30 mm letters
(1 line)

- Optimum transport safety thanks to antislip edge on 4 sides

- Additional central detent
- Ideal for use with E-boxes

- The perfect complement to the EURO H1 hygienic pallet and the E-box system

- Very good cleaning properties thanks to closed runner system
