

## Distinguished for "Tested Safety"

### Facts and figures

- Dimensions: 1200 x 800 x 160 mm  
Weight: 18 kg
- Material: HDPE – virgin material  
Colour: Light grey
- Features: 3 runners, welded with central detents with non-slip edge (7 mm)
- Static load-carrying capacity: 5,000 kg  
Dynamic load-carrying capacity: 1,250 kg  
In a racking system: 1,000 kg
- Basis for standard box systems – Compatible with H2 Half Paletts, E boxes (E1-E3) and other standard box systems
  - Welded runners guarantee a high standard of hygiene and low noise levels on roller tables
  - Chamfered edges on both sides of all runners for optimal use with forklift trucks
  - The H1 hygienic pallet without central detents and non-slip edge (7mm) is manufactured using the same parameters and quality standards.

A certified manufacturer for more than 20 years

## EURO H1 HYGIENIC PALLETS

The plastic pallet of the European food industry

## Tested quality

Certified (DIN 55423-5, 55423-6)

- Polyethylene, virgin
- Weight – maximum tolerance deviation  $\pm 1\%$
- Suitable for a temperature range from  $-40\text{ }^{\circ}\text{C}$  to  $+70\text{ }^{\circ}\text{C}$
- Runners closed and water-tight
- Stable dimensions and shape
- Light grey in colour

## Tests

### Unrestricted fitness for use

- Surfaces free from foreign bodies, cavities, cracks, scratches and other defects
- Resistant to detergents and disinfectants, washing temperature  $\rightarrow 90\text{ }^{\circ}\text{C}$  for short periods

### Static load test

- In a racking system  $\rightarrow 850\text{ kg}$  – max. deflection 12 mm
- Compression test

### Dynamic tests

- Drop test  $\rightarrow +40\text{ }^{\circ}\text{C}/-25\text{ }^{\circ}\text{C}$  from 2 m
- Corner test  $\rightarrow +40\text{ }^{\circ}\text{C}/-28\text{ }^{\circ}\text{C}$  from 4 m
- Impact test
- Roller conveyor endurance test
- Internal pressure test
- Wetting agent immersion test

## Compelling advantages

GS1 certified – Solution Partner

### Safe

**Solution Partner**  
WERIT Kunststoffwerke W. Schneider GmbH & Co. KG

### Quality Assurance

The stringent approval and monitoring procedures ensure that the EURO H1 hygienic pallet retains its consistently high quality in the open pool.

### A safe investment

EURO H1 hygienic pallets meet the highest quality requirements and are therefore exchangeable everywhere.

### Unmistakeable

### Simple allocation

Thanks to the logo of GS1 Germany, EURO H1 hygienic pallets can be recognised at first glance on their arrival.

### Traceability

As a result of the GS1 approval number every palette can be traced back to the palette manufacturer and the associated tool - an effective protection against cheap copies.

### Economic

### Supply chain

Everyone involved along the supply chain benefits from the Quality Assurance system - the raw material suppliers, the manufacturers and the users.
